Match Rules

Scoring System

- EACH match consists of 1 game of 21 points.
- Every time there is a serve – there is a point scored.
- The side winning a rally adds a point to its score.
- At 20 all, the side which gains a 2-point lead first, wins that game.
- At 29 all, the side scoring the 30th point, wins that game.

Doubles

- A side has only one 'service'.
- The service passes consecutively to the players as shown in the diagram.
- At the beginning of the game and when the score is even, the server serves from the right service court. When it is odd, the server serves from the left court.
- If the serving side wins a rally, the serving side scores a point and the same server serves again from the alternate service court.
- If the receiving side wins a rally, the receiving side scores a point. The receiving side becomes the new serving side.
- The players do not change their respective service courts until they win a point when their side is serving.
- If players commit an error in the service court, the error is corrected when the mistake is discovered.

In a doubles match between A & B against C & D, if A & B won the toss and decided to serve, then A will serve to C. A shall be the initial server while C shall be the initial receiver.

Scenarios:

Scenario	Score	Service From	Server	Winner	
	Love All	Right Service Court because the score of the serving side is even.	A serves to C. A and C are the initial server and receiver.	A & B	
A & B win a point. A & B will change service courts. A serves again from Left service court. C & D will stay in the same service courts.	1-0	Left Service Court because the score of the serving side is odd.	A serves to D.	C & D	
C & D win a point and also right to serve. Nobody will change their respective service courts.	1-1	Left Service Court because the score of the serving side is odd.	D serves to A.	A & B	

A & B win a point and also right to serve. Nobody will change their respective service courts.	2-1	Right Service Court because the score of the serving side is even.	B serves to C.	C & D	
C & D win a point and also right to serve. Nobody will change their respective service courts.	2-2	Right Service Court because the score of the serving side is even.	C serves to B.	C & D	
C & D win a point. C & D will change service courts. C serves from Left service court. A & B will stay in the same service courts.	3-2	Left Service Court because the score of the serving side is odd.	C serves to A.	A & B	
A & B win a point and also right to serve. Nobody will change their respective service courts.	3-3	Left Service Court because the score of the serving side is odd.	A serves to C.	A & B	
A & B win a point. A & B will change service courts. A serves again from Right service court. C & D will stay in the same service courts.	4-3	Right Service Court because the score of the serving side is even.	A serves to D.	C & D	

Note that this means:

- The order of serve depends on whether the score is odd or even.
- The service court is changed by the servicing side only when a point is scored. In all other cases, the players continue to stay in their respective service court from where they played the previous rally. This guarantees an alternate server.
